INVESTMENT OBJECTIVE

The Knights of Columbus International Equity Fund seeks long-term capital appreciation. The equity securities in which the Fund invests are primarily common stocks, but may also include American Depositary Receipts (ADRs), which are traded on U.S. exchanges and represent an ownership in a foreign security. The Fund may invest in securities of companies with any market capitalization.

INVESTMENT PROCESS

The investment process begins with quantitative research and modeling that help us define the market environment, analyze the investment universe and rank stocks from most to least attractive. The portfolio team incorporates a fundamental overlay to the process by reviewing buy/sell candidates to validate and interpret model rankings within a portfolio construction framework of maintaining geographic and sector diversification. Catholic screens are applied to ensure that all purchase candidates meet the USCCB investment guidelines.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth less than their original cost and current performance may be higher or lower than the performance quoted. The Fund charges a 2.00% redemption fee on shares held less than 30 days. Investment performance does not reflect this redemption fee; if it was reflected, the total return would be lower than shown. For performance data current to the most recent month end, please call 1-844-KC-FUNDS.

* The inception date of the Bloomberg World ex-US Catholic Values Large & Mid Cap Total Return Index was September 9, 2021, and as such no performance information is available for periods prior to September 9, 2021.

** Lipper does not provide fund specific inception date returns.

GROWTH OF \$10,000 (As of 12/31/25)

Chart depicts the value of a hypothetical \$10,000 investment in the Fund over the past 10 years (or since inception for funds lacking 10-year history). Investment performance is for Class I shares, and assumes the reinvestment of dividends and capital gains. The performance would have been lower if the Class A sales charges were deducted.

QUARTERLY COMMENTARY

Global equities had yet another strong quarter, capping off a fantastic year. Headline international, developed, and emerging market returns were all over 30% for 2025. The Bloomberg World ex US Large/Mid Index returned +4.96%, beating US equities per the Bloomberg 1000, which rose +2.39%.

Sector return dispersion remained high, with Information Technology at +11% and Communication Services at -6%. All regions were positive. Latin America was the leader at +9.6%, led by Chile (+23.0%), though the country weight is small (0.25%). Pac Rim ex-Japan was the weakest region, with a barely positive +0.4%.

The Fund returned +3.68% for the quarter, lagging the benchmark World ex US Catholic Values Large/Mid Index, which returned +4.99%. Factor contribution was net neutral, with a positive impact from earnings yield offset by a negative market effect.

For the Bloomberg World ex US benchmark, the Catholic-screened benchmark outperformed the unscreened version by 3 basis points, and tracking between the two was tight during the quarter.

Stock selection net of factor contribution was negative. Our most positive attribution was Health Care. The sector return was +14.8%, and all three of our holdings rose between +9% and +16%. Belgian biotech Argenx SE (0.9% Average Weight, +16.1% Total Return) rallied after 2 strong earnings report. Newly held Ambea AB (0.3%, +15.0%) recovered strongly from lows due to a share offering. A close second in positive impact was Information Technology.

The information provided herein represents the opinion of the manager at a specific point in time and is not intended to be a forecast of future events, a guarantee of future results nor investment advice.

Driven by AI enthusiasm, SK Hynix, Inc. (1.0%, +82.3%) shot up +82.3% and Samsung Electronics Co., Ltd. (1.8%, +39.0%) rose +39.0%. Both S. Korean companies provide chips used in data centers.

The worst sector for selection was Financials. Japanese insurer Tokio Marine Holdings Inc (1.0%, -12.6%) came under pressure when it announced an investment realignment. UK-based private equity firm 3I Group PLC (1.3%, -19.4%) sank after its largest holding announced slowing growth rates. Materials was the next worst sector for selection. Two industrial gas producers led the losses – Linde PLC (0.2%, -6.5%) and Air Liquide SA (1.3%, -9.4%) fell on weaker business trends and lower analyst estimates.

Both developed and emerging markets outperformed the US during the quarter, and many analysts continue to cite the lower valuations of international stocks as an advantage as well as weak US Dollar trends, which increase profits and stock returns in other currencies. Business trends are expected to be strong in 2026, with benchmark earnings estimated to increase at +12.6%. Similarly, projected GDP growth estimates have increased notably over the last few months for several countries with large weights in the benchmark. We expect many of the same drivers from 2025 to continue, including trends from opportunities in artificial intelligence to opportunities in banking stemming from central bank easing and steeper rate curves.
