

## How the Survey was Conducted

---

### **Nature of the Sample: Knights of Columbus/Marist Poll of 1,371 National Adults**

This survey of 1,371 adults was conducted January 8<sup>th</sup> through January 9<sup>th</sup>, 2024 by the Marist Poll sponsored in partnership with the Knights of Columbus. Adults 18 years of age and older residing in the United States were contacted through a multi-mode design: By phone using live interviewers, by text, or online. Survey questions were available in English or Spanish. Phone and online samples were selected to ensure that each region was represented in proportion to its adult population. The samples were then combined and balanced to reflect the 2022 American Community Survey 5-year estimates for age, gender, income, race, and region. Results are statistically significant within  $\pm 3.6$  percentage points. There are 1,254 registered voters. The results for this subset are statistically significant within  $\pm 3.8$  percentage points. Tables include results for subgroups to only display crosstabs with an acceptable sampling error. It should be noted that although you may not see results listed for a certain group, it does not mean interviews were not completed with those individuals. It simply means the sample size is too small to report. The error margin was adjusted for sample weights and increases for cross-tabulations.

## Nature of the Sample
